

# Climate Change (Scotland) Act 2009

## 2009 asp 12

### PART 1

#### EMISSIONS REDUCTION TARGETS

##### *Baseline*

#### **11 The baseline**

- (1) In this Act, the “baseline” means the aggregate amount of—
  - (a) net Scottish emissions of carbon dioxide for 1990; and
  - (b) net Scottish emissions of each of the greenhouse gases other than carbon dioxide for the year that is the baseline year for that gas.
- (2) The baseline years for greenhouse gases other than carbon dioxide are—
  - (a) for methane, 1990;
  - (b) for nitrous oxide, 1990;
  - (c) for hydrofluorocarbons, 1995;
  - (d) for perfluorocarbons, 1995;
  - (e) for sulphur hexafluoride, 1995.
