

# **NATURE CONSERVATION (SCOTLAND) ACT 2004**

---

## **EXPLANATORY NOTES**

### **COMMENTARY ON SECTIONS**

#### **Part 2 – Conservation and Enhancement of Natural Features**

##### *Chapter 1 – Sites of Special Scientific Interest*

##### **Notification of sites of special scientific interest**

##### *Section 4 Site management statements*

42. This section requires that each SSSI notification must be accompanied by a site management statement prepared by SNH. The site management statement does not form part of the SSSI notification, but is a separate document which provides practical guidance to the owners and occupiers of the SSSI in relation to conservation and enhancement of the protected natural feature. It may also contain other information, including information which promotes the understanding and enjoyment of the natural feature by the general public.
43. The role of the site management statement is to complement and expand upon the rather technical and scientific information in the SSSI notification. To that end, SNH can use a site management statement to provide information and advice, in non-scientific language wherever possible, setting out how land managers can best secure the long-term protection of the site. At a practical level it will, for example, allow SNH to assist land managers in planning and carrying out operations on the site in ways which are consistent with, and sensitive to, the conservation needs of the SSSI. Overall, the site management statement is intended to assist owners and occupiers, and their employees or contractors, to manage the site responsibly and in the most effective manner.
44. SNH can make use of site management statements as evolving documents. The provisions in subsections (3) and (4) enable the statements to be reviewed and updated in a manner which ensures that they continue to fulfil their purpose effectively. That process of review may be initiated either by SNH or by the owner or occupier of land within the SSSI.
