▼B**COMMISSION DECISION****of 10 April 1992****on animal health conditions and veterinary certification for temporary admission of registered horses**

(92/260/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Directive 90/426/EEC of 26 June 1990 on animal health conditions governing the movement and import from third countries of equidae ⁽¹⁾, as last amended by Commission Decision 92/130/EEC ⁽²⁾, in particular Articles 15 (a) and 16 thereof,

Whereas by Council Decision 79/542/EEC ⁽³⁾, as last amended by Commission Decision 92/162/EEC ⁽⁴⁾, the list of third countries from which the Member States authorize imports of equidae in particular has been established;

Whereas it is also necessary to take into account the regionalization of certain third countries, which is the subject of Commission Decision 92/160/EEC ⁽⁵⁾, as amended by Decision 92/161/EEC ⁽⁶⁾;

Whereas the existence of equivalent health situations between certain third countries justifies establishing several health zones for the importation of equidae;

Whereas the different categories of horses have their own features and their imports are authorized for different purposes; whereas, consequently, specific health requirements must be established for temporary admissions of registered horses;

Whereas, given the existence of different health situations, it is necessary to establish several health certificates for temporary admission of registered horses;

Whereas this Decision should be re-examined before 31 December 1992;

Whereas the measures provided for in this Decision are in accordance with the opinion of the Standing Veterinary Committee,

HAS ADOPTED THIS DECISION:

Article 1

Without prejudice to Decision 92/160/EEC, Member States shall authorize the temporary admission of registered horses:

- coming from third countries appearing in Annex I,
- conforming to the requirements laid down in one of the specimen animal health certificates in Annex II.

Article 2

This Decision is addressed to the Member States.

▶⁽¹⁾ **HEALTH CERTIFICATE**

for the temporary admission of registered horses into the Community territory from Greenland, Iceland or Switzerland for a period of less than 90 days coming ◀

No of certificate :

Third country of dispatch ⁽¹⁾ :

Ministry responsible :

I. Identification of the horse

(a) No of identification document (passport) :

(b) Validated by
(Name of competent authority)

II. Origin and destination of the horse

The horse is to be sent from :
(Place of export)

to :
(Member State and place of destination)

Name and address of consignor :
.....

Name and address of consignee :
.....

III. Health information

I, the undersigned, certify that the horse described above meets the following requirements :

- (a) It comes from a country where the following diseases are compulsorily notifiable : African horse sickness, Dourine, Glanders, Equine encephalomyelitis (of all types including VEE), Infectious anaemia, Vesicular stomatitis, rabies, anthrax.
- (b) It has been examined today and shows no clinical sign of disease ⁽²⁾.
- (c) It is not intended for slaughter under a national programme of infectious or contagious disease eradication.
- (d) During the last 40 days immediately preceding the exportation it has been resident on holdings under veterinary supervision in :
 - the country of dispatch,
 - and/or
 - Member States of the Community,
 - and/or
 - ▶⁽²⁾ — United Arab Emirates, Australia, Bulgaria, Belarus, Canada, Switzerland, Cyprus, Czech Republic, Estonia, Greenland, Hong-Kong, Croatia, Hungary, Iceland, Japan, Republic of Korea, Lithuania, Latvia, Former Yugoslav Republic of Macedonia, Macao, Malaysia (peninsula), Norway, New Zealand, Poland, Romania, Russia ⁽¹⁾, Singapore, Slovak Republic, Slovenia, Thailand, Ukraine, United States of America, Federal Republic of Yugoslavia. ◀

If it has been moved to the country of dispatch from a country listed in the third indent, it was imported with at least the same animal health requirements as if the horse was imported directly into the European Community.

- (e) It does not come from the territory or in cases of official regionalization according to EEC legislation from a part of the territory of a third country in which :
 - (i) Venezuelan equine encephalomyelitis has occurred during the last two years ;
 - (ii) Dourine has occurred during the last six months ;
 - (iii) Glanders has occurred during the last six months ;

▶⁽¹⁾ M2▶⁽²⁾ M19

▼B

- (iv) Vesicular stomatitis has occurred during the last six months ⁽³⁾,
or
the animal was tested by a virus neutralization test for Vesicular stomatitis on ⁽³⁾, this being within 10 days of export, with negative result at 1 in 12 ⁽³⁾ ⁽⁴⁾;
- ⁽¹⁾ (v) in the case of an uncastrated male animal older than 180 days, either equine viral arteritis has been officially recorded during the last six months ⁽³⁾;
or
— the animal was tested ⁽⁴⁾ on a blood sample taken within 21 days of export on ... ⁽⁵⁾ by virus neutralization test for equine viral arteritis with negative result at a dilution of 1 in 4;
or
an aliquot of its entire semen taken within 21 days of export on ... ⁽⁵⁾ was tested by virus isolation test for equine viral arteritis with negative result ⁽³⁾ ⁽⁴⁾;
or
— the animal was vaccinated on ... ⁽⁵⁾ against equine viral arteritis under official veterinary supervision with a vaccine approved by the competent authority, according to the following programme for initial vaccination and has been re-vaccinated at regular intervals ⁽³⁾ ⁽⁴⁾.
- Programmes for initial vaccination against equine viral arteritis:
Instruction: Cross out vaccination programmes that do not apply to the animal described above.
- (a) Vaccination was carried out on the day a blood sample was taken that subsequently proved negative in a virus neutralization test at a dilution of 1 in 4; or
(b) Vaccination was carried out during a period of isolation of not more than 15 days under official veterinary supervision, commencing on the day a blood sample was taken that was tested during that time with negative result in a virus neutralization test at a dilution of 1 in 4; or
(c) Vaccination was carried out when the animal was at an age of 180 to 270 days, during a period of isolation under official veterinary supervision. During the isolation period two blood samples taken at least 10 days apart proved a stable or declining antibody titre in a virus neutralization test for equine viral arteritis; ◀
- (f) It does not come from the territory or from a part of the territory of a third country considered, in accordance with EEC legislation, as infected with African horse sickness.
— It was not vaccinated against African horse sickness ⁽¹⁾.
— It was vaccinated against African horse sickness on ⁽¹⁾ ⁽⁴⁾ ⁽⁵⁾.
- (g) It does not come from a holding which was subject to prohibition for animal health reasons nor had contact with equidae from a holding which was subject to prohibition for animal health reasons :
(i) during six months in the case of Equine encephalomyelitis, beginning on the date on which the equidae suffering from the disease are slaughtered ;
(ii) in the case of infectious anaemia, until the date on which, the infected animals having been slaughtered, the remaining animals have shown a negative reaction to two Coggins tests carried out three months apart ;
(iii) during six months in the case of Vesicular stomatitis ;
(iv) during one month from the last recorded case, in the case of rabies ;
(v) during 15 days from the last recorded case, in the case of anthrax,
or
if all the animals of species susceptible to the disease located on the holding have been slaughtered and the premises disinfected, the period of prohibition shall be 30 days, beginning on the day on which the animals were destroyed and the premises disinfected, except in the case of anthrax, where the period of prohibition is 15 days.
- (h) To the best of my knowledge, it has not been in contact with equidae suffering from an infectious or contagious disease in the 15 days prior to this declaration.

▼B

- IV. I have a written declaration signed by the owner or the representative⁽¹⁾, stating that :
- the horse will be sent directly from the premises of dispatch to the premises of destination without coming into contact with other equine animals not accompanied by such a certificate, in a vehicle cleansed and disinfected in advance with a disinfectant officially recognized in the country of dispatch,
 - the conditions of point III (d) are fulfilled.

DECLARATION

I, the undersigned,
 [Owner or representative⁽¹⁾ of the horse described above]

declare :

1. the horse will be resident inside the European Community for a period not longer than 90 days ;
2. I agree with the statement indicated in paragraph IV ;
3. this horse has either remained in (exporting country) since birth or entered (exporting country) on⁽¹⁾ ⁽¹⁾.

.....
 (Place, date)

.....
 (Signature)

- V. The certificate is valid for 10 days. In the case of transport by ship, the time is prolonged by the time of the voyage.

Date	Place	Stamp and signature of the official veterinarian

.....
 Name in block capitals and capacity

- VI. Date and place of entry into the territory of the Community :
-
-
 (Stamp and signature of the official veterinarian)

Date of export :

- VII. Where the horse subsequently moves from the Member State referred to in point II to another Member State, the term of the certificate must be extended for a further 10 days by an official veterinarian of the Member State of dispatch. The total period of residence on the territory of the Community must not be more than 90 days.

▼B

I, the undersigned, have examined the horse today and certify that it meets the conditions of Directive 90/426/EEC and in particular, the requirements of point III (b), (c), (g) and (h) of this certificate.

Date of examination	Place of examination	Place of destination	Stamp and signature of the official veterinarian

.....
Name in block capitals and capacity

(¹) Or part of territory in accordance with Article 13 (2) of Directive 90/426/EEC.

(²) The certificate must be issued on the day of loading of the animal for dispatch to the Member State of destination or on the last working day before embarkation and accompanied by the identification document (passport) during the time of residence in the Community.

(³) Delete as appropriate.

(⁴) The test(s) carried out, their results and the vaccination have to be entered in the identification document (passport).

(⁵) Insert date.

Third country of dispatch ⁽¹⁾:

Ministry responsible:

I. Identification of the horse

(a) Identification document No (passport):

(b) Validated by:

(Name of competent authority)

II. Origin and destination of the horse

The horse is to be sent from:

(Place of export)

directly to:

(Member State and place of destination)

by aircraft ⁽²⁾:

(indicate flight number)

or

by vessel ⁽³⁾:

(indicate name of vessel)

Name and address of consignor:

.....

Name and address of consignee:

.....

III. Health information

I, the undersigned official veterinarian of

(insert name of country)

certify that the horse described above:

(a) comes from a country where the following diseases are compulsorily notifiable: African horse sickness, dourine, glanders, equine encephalomyelitis of all types including Venezuelan equine encephalomyelitis, equine infectious anaemia, vesicular stomatitis, rabies, anthrax;

(b) has been examined today and shows no clinical signs of disease ⁽²⁾;

(c) is not intended for slaughter under a national programme of infectious or contagious disease eradication;

(d) has been resident during the 60 days immediately preceding the exportation on holdings under veterinary supervision:

— on the territory of the country ⁽¹⁾ of dispatch,

and

— in a Member State of the European Union, if it was imported into the country ⁽¹⁾ of dispatch directly from a Member State of the European Union ⁽¹⁾,

and

▼ **M20**

— on the territory of a third country ⁽¹⁾ approved for temporary admission or permanent imports into the European Union of registered horses, if it was imported directly into the country ⁽¹⁾ of dispatch under conditions at least as strict as laid down for the temporary admission or permanent imports of registered horses from the third country concerned directly into the European Union ⁽³⁾,

and

has undergone the pre-export isolation during the last 40 days immediately preceding the exportation from ⁽⁵⁾ to ⁽⁵⁾ in the approved quarantine station at under the following conditions:

(i) the horse was accommodated permanently under vector-protected conditions ⁽³⁾;

or

(ii) the horse has been confined to the vector-protected stables at least from two hours prior to sunset until two hours after sunrise the next day and exercise was provided under official veterinary supervision, following the application of effective insect repellents prior to the removal from the stables, and in strict isolation from equidae not being prepared for export under conditions at least as strict as required for temporary admission or imports into the European Union ⁽³⁾;

(e) comes from the territory of a country ⁽¹⁾ in which:

(i) Venezuelan equine encephalomyelitis has not occurred during the last two years;

(ii) dourine has not occurred during the last six months;

(iii) glanders has not occurred during the last six months;

(iv) vesicular stomatitis has not occurred during the last six months ⁽³⁾;

or

was tested on a sample of blood taken, within 21 days of export, on ⁽⁵⁾, by virus neutralization test for vesicular stomatitis, with negative result at a dilution of 1 in 12 ⁽³⁾ ⁽⁴⁾;

(v) in the case of an uncastrated male animal older than 180 days:

(1) either equine viral arteritis has not been officially recorded during the last six months ⁽³⁾,

or

(2) the animal was tested:

— either on a blood sample taken within 21 days of export on ⁽⁵⁾ by virus neutralization test for equine viral arteritis with negative result at a dilution of 1 in 4 ⁽³⁾ ⁽⁴⁾,

or

— on an aliquot of the entire semen of the horse taken within 21 days of export on ⁽⁵⁾ by virus isolation test for equine viral arteritis with negative result ⁽³⁾ ⁽⁴⁾,

or

(3) the animal was vaccinated on ⁽⁵⁾ against equine viral arteritis under official veterinary supervision with a vaccine approved by the competent authority, according to the following programmes for initial vaccination and has been re-vaccinated at regular intervals ⁽³⁾ ⁽⁴⁾.

Programmes for initial vaccination against equine viral arteritis:

Instruction: Cross out vaccination programmes that do not apply to the animal described above.

(a) Vaccination was carried out on the day a blood sample was taken that subsequently proved negative in a virus isolation test for equine viral arteritis at a dilution of 1 in 4.

(b) Vaccination was carried out during a period of isolation of not more than 15 days under official veterinary supervision commencing on the day a blood sample was taken that was tested during that time with negative result in a virus neutralization test for equine viral arteritis at a dilution of 1 in 4.

(c) Vaccination was carried out when the animal was at an age of 180 to 270 days, during a period of isolation under official veterinary supervision. During the isolation period two blood samples taken at least 10 days apart proved a stable or declining antibody titre in a virus neutralization test for equine viral arteritis.

▼ **M20**

- (f) does not come from the territory of a country ⁽¹⁾ considered, in accordance with EC legislation, as infected with African horse sickness and was either:
- not vaccinated against African horse sickness ⁽³⁾,
 - or
 - was vaccinated against African horse sickness on ⁽³⁾, not more than 24 months and at least 80 days prior to pre-export isolation, by administration of a registered vaccine as prescribed by the vaccine manufacturer ⁽³⁾ ⁽⁴⁾;
- (g) does not come from a holding which was subject to a prohibition order for animal health reasons which laid down the following conditions:
- (i) If not all the animals of species susceptible to the disease located on the holding were slaughtered, the prohibition lasted for:
- six months in the case of equine encephalomyelitis, beginning on the date on which the equidae suffering from the disease are slaughtered,
 - a period required to carry out with negative results two Coggins tests three months apart on the animals remaining after the infected animals have been slaughtered in the case of infectious anaemia,
 - six months in the case of vesicular stomatitis,
 - one month from the last recorded case, in the case of rabies,
 - 15 days from the last recorded case, in the case of anthrax.
- (ii) If all the animals of species susceptible to the disease located on the holding were slaughtered, the prohibition lasted for 30 days, or 15 days in the case of anthrax, beginning on the day on which following the destruction of the animals the disinfection of the premises was satisfactorily completed;
- (h) has, to the best of my knowledge and according to the declaration of the owner or his representative, not been in contact with animals showing clinical signs of an infectious or contagious disease transmissible to equidae during 15 days prior to pre-export isolation;
- (i) was subjected to the following tests carried out with negative results on samples of blood taken, within 21 days of export, on ⁽⁴⁾ ⁽³⁾:
- a Coggins test for equine infectious anaemia,
 - a complement fixation test for dourine at a dilution of 1 in 5;
- (j) was subjected to a test for African horse sickness as described in Annex D to Directive 90/426/EEC on two occasions, carried out on samples of blood taken with an interval of between 21 and 30 days on ⁽³⁾ and on ⁽³⁾, the second of which was taken within 10 days of export either:
- with negative reactions, if it has not been vaccinated ⁽³⁾ ⁽⁴⁾, or
 - without increase in antibody level, if it has been vaccinated ⁽³⁾ ⁽⁴⁾;
- (k) was subjected to an ELISA test for equine encephalosis on two occasions, carried out on samples of blood taken with an interval of between 21 and 30 days on ⁽³⁾ and on ⁽³⁾, the second of which was taken within 10 days of export either:
- with negative reactions ⁽³⁾ ⁽⁴⁾, or
 - without increase in antibody level ⁽³⁾ ⁽⁴⁾.

IV. The horse will be sent directly from the quarantine station

- (a) either to the airport under vector-protected conditions and will be sent to the Member State of the European Union without coming into contact with other equidae not accompanied by an EC certificate either for permanent imports or for temporary admission and will be transported in an aircraft which was cleansed and disinfected in advance with a disinfectant officially recognised in the country of dispatch and sprayed against vector insects just prior to take-off ⁽³⁾,
- or
- (b) to the port of Cape Town under vector-protected conditions and will be sent to the Member State of the European Union without coming into contact with other equidae not accompanied by an EC certificate either for permanent imports or for temporary admission and will be transported on a vessel which is scheduled directly to a port in the European Union without calling into a port situated on the territory of a country ⁽¹⁾ not approved for imports into the European Union of equidae in stalls which were cleansed and disinfected in advance with a disinfectant officially recognised in the country of dispatch and sprayed against vector insects just prior to role-off ⁽³⁾.

The attached declaration signed by the owner or representative is part of the certificate.

VI. Date and place of entry into the European Union

.....
.....

.....
(Stamp and signature of the official veterinarian) ⁽⁶⁾

Date of export from the European Union:

VII. Where the horse subsequently moves from one Member State to another as indicated in the declaration, the period of validity of the certificate must be extended for a further 10 days by an official veterinarian of the Member State of dispatch. The identity check carried out on this occasion has to be certified in the passport.

I, the undersigned have examined the horse today and certify that it meets the conditions of Directive 90/426/EEC and, in particular, the requirements of paragraph III (b), (c) and (g) of this certificate.

To the best of my knowledge it was during the last 15 days not in contact with equidae suffering from an infectious or contagious disease.

Date of examination	Place of examination	Place of destination	Stamp and signature of the official veterinarian ⁽⁶⁾
