COMMENTARY ON SECTIONS

Section 41 - community strategy reviews

80. A community strategy should be reviewed to consider the extent to which objectives have been met and, if not met, the progress made towards that.
81. In the light of the review, the local authority and its community planning partners may consider it appropriate to amend the community objectives and the actions or to agree new ones. Once consensus has been reached the local authority should amend the community strategy and republish it as soon as reasonably practicable.
