

SCHEDULE 3

Part I

Requirements Relating to Obligatory Dim-Dip Devices and Running Lamps

2. Running lamps fitted to satisfy regulation 21 shall be in the form of a matched pair of front lamps each of which—

- (a) is fitted in a position in which an obligatory front position lamp may lawfully be fitted, and
- (b) is capable of emitting white light to the front having an intensity of not less than 200 candelas, measured from directly in front of the centre of the lamp in a direction parallel to the longitudinal axis of the vehicle, and of not more than 800 candelas in any direction.
