

SCHEDULE 8

Regulations 21 and 23

Requirements relating to obligatory and optional hazard warning signal devices

Every hazard warning signal device shall—

- (a) be operated by one switch;
- (b) cause all the direction indicators with which a vehicle or a combination of vehicles is equipped to flash in phase;
- (c) be provided with a circuit-closed tell-tale in the form of a flashing light which may operate in conjunction with any direction indicator tell-tale; and
- (d) be able to function even if the device which controls the starting and stopping of the engine is in a position which makes it impossible to start the engine.
