

SCHEDULE 6

Additional conditions that apply to the keeping of pigs

Part II

General additional conditions

Inspection

2. All pigs shall be inspected by the owner or keeper of pigs at least once a day to check that they are in a state of well-being.

3. Where necessary, sick or injured pigs shall be isolated in suitable accommodation with dry comfortable bedding.

Tethering

4. A person shall not tether or cause to be tethered any pig except while it is undergoing any examination, test, treatment or operation carried out for any veterinary purpose.

5.—(1) Where the use of tethers is permitted in accordance with paragraph 4, they shall not cause injury to the pigs and shall be inspected regularly and adjusted as necessary to ensure a comfortable fit.

(2) Each tether shall be of sufficient length to allow the pigs to move as stipulated in paragraph 6(2) and the design shall be such as to avoid, as far as possible, any risk of strangulation, pain or injury.

Accommodation

6.—(1) A pig shall be free to turn round without difficulty at all times.

(2) The accommodation used for pigs shall be constructed in such a way as to allow each pig to—

- (a) stand up, lie down and rest without difficulty;
- (b) have a clean place in which it can rest; and
- (c) see other pigs, unless the pig is isolated for veterinary reasons.

7.—(1) The dimension of any stall or pen shall be such that the internal area is not less than the square of the length of the pig, and no internal side is less than 75% of the length of the pig, the length of the pig in each case being measured from the tip of its snout to the base of its tail while it is standing with its back straight.

(2) This paragraph shall not apply in relation to a female pig for the period between seven days before the predicted day of her farrowing and the day on which the weaning of her piglets (including any piglets fostered by her) is complete, provided that, after farrowing, she has sufficient space to enable her to adopt a comfortable posture in which she can be suckled.

(3) A person shall not be guilty of an offence in accordance with regulation 13(1) or failing to comply with this paragraph by reason of the keeping of a pig in a stall or pen—

- (a) while it is undergoing any examination, test, treatment or operation carried out for veterinary purposes;
- (b) for the purposes of service, artificial insemination or collection of semen;

Status: This is the original version (as it was originally made). This item of legislation is currently only available in its original format.

- (c) while it is fed on any particular occasion;
- (d) for the purposes of marking, washing or weighing it;
- (e) while its accommodation is being cleaned; or
- (f) while it is awaiting loading for transportation,

provided that the period during which it is so kept is not longer than necessary for that purpose.

(4) A person shall not be guilty of an offence in accordance with regulation 13(1) of contravening or failing to comply with this paragraph by reason of the keeping of a pig in a stall or pen which the pig can enter or leave at will, provided that the stall or pen is entered from a stall or pen in which the pig is kept without contravention of this paragraph.

Artificially lit buildings

8. Where pigs are kept in an artificially lit building then, subject to paragraph 14 and 16 of Schedule 1, artificial lighting shall be provided for a period at least equivalent to the period of natural light normally available between 9.00 a.m. and 5.00 p.m.

Prevention of fighting

9.—(1) If pigs are kept together, measures shall be taken to prevent fighting which goes beyond normal behaviour.

(2) Pigs that show persistent aggression towards others or are victims of such aggression shall be isolated or kept separate from the group.

Cleansing and disinfection

10.—(1) Housing, pens, equipment and utensils used for pigs must be properly cleansed and disinfected as necessary to prevent cross-infection and the build-up of disease-carrying organisms.

(2) Faeces, urine and uneaten or spilt food must be removed as often as necessary to minimise smells and avoid attracting flies or rodents.

Lying area

11.—(1) Where pigs are kept in a building they shall be kept on, or have access at all times to, a lying area which is clean, comfortable and does not adversely affect them, and is well-drained or well maintained with dry bedding.

(2) Where bedding is provided, this must be clean, dry and not harmful to the pigs.

Floors

12. Where pigs are kept in a building, floors shall—

- (a) be smooth but not slippery so as to prevent injury to the pigs;
- (b) be so designed as not to cause injury or suffering to pigs standing or lying on them;
- (c) be suitable for the size and weight of the pigs; and
- (d) form a rigid, even and stable surface.

Feeding

13.—(1) All pigs must be fed at least once a day.

(2) Where pigs are housed in a group and do not have continuous access to feed, or are not fed by an automatic feeding system, each pig must have access to the food at the same time as the others in the feeding group.

Drinking water

14. All pigs shall be provided with an adequate supply of fresh drinking water each day.

Environmental enrichment

15. In addition to the measures normally taken to prevent tail-biting and other vices and in order to enable them to satisfy their behavioural needs, all pigs, taking into account environment and stocking density, shall have access to straw or other material or object suitable to satisfy those needs.

Prohibition on the use of the sweat-box system

16. Pigs shall not be kept in an environment that involves maintaining high temperatures and high humidity (known as the “sweat-box system”).
