EXPLANATORY NOTE

(This note is not part of the Regulations.)

The Notification of Installations Handling Hazardous Substances Regulations (Northern Ireland) 1984 ([S.R. 1984 No. 177](#)) (“the 1984 Regulations”) prohibit the handling of certain hazardous substances in a quantity equal to or exceeding the quantity specified in Part I of Schedule 1, unless the Health and Safety Executive for Northern Ireland (“the Executive”) has been notified.

These Regulations amend the 1984 Regulations to include ammonium nitrate and mixtures containing ammonium nitrate by –

- (a) inserting in regulation 3, 4 weeks as the minimum period of notice in the case of a hazardous substance consisting of ammonium nitrate or a mixture containing ammonium nitrate;
- (b) excepting those substances from regulation 7(1), which provides that the enforcing authority for a site at which they are handled is always the Executive;
- (c) adding regulation 9, containing transitional provision; and
- (d) adding the description of ammonium nitrate and mixtures containing ammonium nitrate to the list of hazardous substances in Part I of Schedule 1.

In Great Britain, the corresponding Regulations are the Notification of Installations Handling Hazardous Substances (Amendment) Regulations 2002 ([S.I. 2002/2979](#)). Copies of the Regulatory Impact Assessment relating to those Regulations together with a Northern Ireland Supplement are held at the offices of the Health and Safety Executive for Northern Ireland at 83 Ladas Drive, Belfast, BT6 9FR from where copies may be obtained on request.

A person who contravenes the Regulations is guilty of an offence under Article 31 of the Health and Safety at Work (Northern Ireland) Order 1978 and is liable, on summary conviction, to a fine not exceeding the statutory maximum (currently £5,000) or, on conviction on indictment, to a fine.
