PART 2

Groundwater assessment

[^{F13}General Duty in the Neagh Bann, North Western and Shannon International River Basin Districts

7. In discharging its functions in compliance with these Regulations the Department shall cooperate, in accordance with Article 3(4) of the Water Framework Directive, with the Government Department in Ireland having responsibility for corresponding functions, so as to secure that the assessment of groundwater chemical status, the establishment of threshold values, identification of significant and sustained upward trends and determination of the starting point for trend reversal is co-ordinated for the whole of the international river basin districts.]

Threshold values

8.—(1) A list of threshold values must be derived in accordance with Parts A and B of Annex II to the Directive on the basis of methodologies approved by the Department. [^{F14}The Department may derive threshold values at the national level, level of the river basin district or at the level of a body or a group of bodies of groundwater]

(2) The Department shall amend the list of threshold values whenever new information indicates that a threshold value should be set for an additional substance, that an existing threshold value should be amended, or that a threshold value previously removed from the list should be reinserted, in order to protect human health and the environment.

(3) Where in the opinion of the Department a body of groundwater is no longer at risk from a pollutant, group of pollutants or indicator of pollution, the Department may revoke the threshold value for that pollutant, group of pollutants or indicator of pollution.

(4) The Department shall supply to the Government Department in Ireland having responsibility for corresponding functions, copies of proposals under this paragraph relating to threshold values for bodies of groundwater associated with the Neagh Bann, North Western and Shannon International River Basin Districts.

(5) The Department shall apply the threshold values [^{F15}listed in [^{F16}Schedule 1]] for the purposes of assessing groundwater chemical status and determining the starting point for trend reversal.

[^{F17}(6) Where any threshold value is breached and subsequent monitoring is performed—

- (a) the body of groundwater should not be classed as good chemical status if both (a) the average of all the monitoring results from all the monitoring points representative of the risk to the quality of the groundwater exceeds the threshold value; and (b), additionally, the concentration of the pollutant to which the threshold value applies exceeds the maximum concentration allowed for it in drinking water in at least one sample from an appropriately representative monitoring point;
- (b) the body of groundwater should not be classed as good chemical status if (i) the threshold values is exceeded across any plume of pollutants extending for over 2 square kilometres or more; and (ii) the maximum concentration allowed in drinking water for any of the pollutants in the plume is exceeded in at least part of the plume.

(7) The Schedule has effect.]

Significant and sustained upward trends and the starting point for trend reversal

10.—(1) Subject to [^{F21}paragraph] (8), for the purposes of giving effect to paragraphs 2.4.4 and 2.4.5 of Annex V to the Water Framework Directive, the Department shall [^{F22}, in accordance with Annex IV to the Directive], in relation to each body or group of bodies of groundwater that it has characterised as being at risk of failing to meet the objectives under Article 4 of that Directive —

- (a) identify any significant and sustained upward trend in pollutant concentrations, groups of pollutants or indicators of pollution; and
- (b) determine the starting point for reversal of each trend so identified.

Changes to legislation: There are outstanding changes not yet made by the legislation.gov.uk editorial team to Groundwater Regulations (Northern Ireland) 2009. Any changes that have already been made by the team appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

(2) A body of groundwater shall be treated as being subject to a significant and sustained upward trend where it is subject to a statistically significant increase of concentrations of a pollutant, group of pollutants or indicator of pollution, which represents a significant environmental risk.

(3) The Department shall base the assessment of whether a body of groundwater is subject to a significant and sustained upward trend on information from the sources specified in ^{F23}paragraph (4), assessed in accordance with paragraph 2(c) and (d) of Part A of Annex IV to the Directive.

^{F24}(4) The sources mentioned in paragraph (3) are—

- (a) the monitoring programmes for groundwater—
 - (i) established under the provisions specified in regulation 11 of the 2017 Regulations; and
 - (ii) designed in accordance with the requirements of those provisions and paragraphs 1 and 2(a) and (b) of Part A of Annex IV to the Directive; and
- (b) for the purposes of identifying trends for the first river basin management plan, any data deemed relevant by the Department and gathered before the start of the monitoring programmes under sub-paragraph (4)(a).]

(5) ^{F25}Where necessary to assess the impact of existing plumes of pollution in bodies of groundwater that may threaten the achievement of the objectives in regulation 13(5) of the 2017 Regulations, the Department shall carry out an additional trend assessment in order to verify that a plume of pollution from a contaminated site does not—]

- (a) expand;
- (b) cause a deterioration in the chemical status of a body or group of bodies of groundwater; or
- (c) present a risk to human health or the environment.

(6) The starting point for trend reversal must be determined in accordance with Article 5(3) and ^{F26}... Part B of Annex IV to the Directive.

^{F27}(6A) For the identification of significant and sustained upward trends in the concentration of substances which cover both naturally and as a result of human activities the Department must consider the baseline levels and, where such data is available, the data collected before the start of the monitoring programme in order to report on trend identification within the first river basin management plan referred to in Article 13 of the Water Framework Directive.]

(7) On 22 December 2015 and on each sixth anniversary thereafter, the Department shall review and where necessary revise its determination made under ^{F28}paragraph (1).

(8) In relation to pollutants or indicators of pollution for which insufficient information is available to identify significant and sustained upward trends and determine starting points for trend reversal by a date to be determined by the Department, the Department shall comply with ^{F29}paragraph (1) as soon as possible after that date.

Discharges that may be authorised

16. Notwithstanding regulations 14 and 15, provided it does not compromise the achievement of any of the environmental objectives relating to groundwater [^{F40}set out in the relevant river basin management plan and without prejudice to any more stringent requirement in retained EU law], the Department may grant an authorisation for—

- (a) the injection of water containing substances resulting from the operations for exploration and extraction of hydrocarbons or mining activities, and injection of water for technical reasons, into geological formations from which hydrocarbons or other substances have been extracted or into geological formations which for natural reasons are permanently unsuitable for other purposes, provided that the injection does not contain substances other than those resulting from the above operations;

Authorisations generally

17.—(1) When the Department receives an application for an authorisation that might lead to the discharge of a pollutant, it must ensure that all necessary investigations have been carried out to ensure that it grants any authorisation in accordance with regulation 14 or 15.

(2) If it grants an authorisation, it must include conditions requiring all necessary technical precautions to be observed to ensure the objectives of regulations 14 and 15 are achieved.

(3) An authorisation may not be granted without examination of—

- (a) the hydrogeological conditions of the area concerned;
- (b) the possible purifying powers of the soil and subsoil; and
- (c) the risk of pollution and alteration of the quality of the groundwater from the discharge,

and without establishing whether the input of pollutants into groundwater is a satisfactory option in the best interests of the environment.

(4) An authorisation may only be granted if the Department has checked that the groundwater (and, in particular, its quality) will undergo the requisite investigations under (1).

Discharge of a hazardous substance or non-hazardous pollutant

19.—(1) It is an offence to cause or knowingly permit the discharge of any hazardous substance or non-hazardous pollutant in circumstances that might lead to an indirect input of that hazardous substance or non-hazardous pollutant into groundwater unless it is carried out under and in accordance with an authorisation granted by the Department under this regulation.

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations implement in Northern Ireland Directive [2006/118/EC](#) of the European Parliament and of the Council of 12 December 2006 on the protection of groundwater against pollution and deterioration, OJNo. L372, 27.12.2006, p.19. They continue to implement Directive [2000/60/EC](#) of the European Parliament and of the Council (establishing a framework for Community action in the field of water policy, OJ No. L327, 22.12.2000. p.60).

They revoke and replace the Groundwater Regulations (Northern Ireland) 1998.

Part 1 of the Regulations is introductory.

Part 2 transposes Articles 3, 4 & 5 of Council Directive [2006/118/EC](#) in relation to the classification of groundwater bodies, the establishment of threshold values and the identification of trends and starting points for their reversal.

Part 3 places requirements on the Department when they grant an authorisation under these Regulations and a consent under Article 7A of the Water (Northern Ireland) Order 1999, (as inserted by Article 280 of The Water and Sewerage Services (Northern Ireland) Order 2006), and ensures the review of all authorisations for compliance with the conditions of the authorisation.

Part 4 creates an offence of a discharge of a hazardous substance or non-hazardous pollutant without an authorisation, and provision as to how an authorisation for this is applied for.

Part 5 is concerned with enforcement. Regulation 24 gives the Department powers to require information and regulation 25 gives the Department powers to serve notices prohibiting activities, or authorising them subject to conditions. Regulation 27 provides for codes of practice and regulation 29 details the penalties that may be applied if a person or body corporate is found guilty of an offence under regulations 19, 24 or 25.
