

SCHEDULE 6

Location of sampling points

PART 2

Macroscale siting for Group B pollutants and polycyclic aromatic hydrocarbons

6. The sites of sampling points shall be selected in such a way as to provide data on—
 - (a) the areas within zones where the population is likely to be directly or indirectly exposed to the highest concentrations averaged over a calendar year;
 - (b) concentrations in other areas within zones which are representative of the exposure of the general population;
 - (c) deposition rates representing the indirect exposure of the population through the food chain.
