1.—(1) Except for a small producer who has elected to follow the allocation method [^{F2}and subject to paragraph 1A], a producer’s obligations to ^{F3}...recycle packaging waste in a relevant year are, in relation to each class of producer to which he belongs—

- (a) to [^{F4}recycle] an amount of packaging waste as provided in paragraph 3(1) below;
- ^{F5}(b)
- (c) as part of the obligation to [^{F6}recycle] packaging waste as provided in paragraph (a) above, to [^{F7}recycle] an amount of packaging materials which is packaging waste, as provided in paragraph 3(3) below, [^{F8}and
- (d) in relation to glass, to recycle by re-melt an amount of glass packaging which is glass packaging waste, as provided in paragraph 3(4),]

and are calculated by aggregating his obligations in relation to each class of producer to which he belongs in respect of that year.

2. Where a small producer has elected to follow the allocation method, his obligations to recycle packaging waste in a relevant year are to recycle an amount of packaging waste as provided in paragraphs 7 and 8 below.

3.—(1) The amount of packaging waste to be [^{F10}recycled] by a producer in relation to a class of producer to which he belongs is calculated as follows—

$$P \times C \times X = Z$$

where—

[^{F11}“P” is the amount of packaging and packaging materials handled in Great Britain by the producer in the preceding year, calculated to the nearest tonne by—

- (a) taking into account packaging, including reused transit packaging, or packaging materials, which were imported into the United Kingdom by the producer; and
- (b) excluding—

Changes to legislation: There are currently no known outstanding effects for the The Producer Responsibility Obligations (Packaging Waste) Regulations 2007, SCHEDULE 2. (See end of Document for details)

- (i) reused sales packaging or primary packaging as defined in paragraph 1(a) of Article 3 of the Packaging Waste Directive;
- (ii) production residues from the production of packaging or packaging materials or from any other production process occurring before, during or after the producer handled the packaging or packaging materials;
- (iii) any packaging or packaging materials so supplied which were exported from the United Kingdom by the producer or which to the producer’s reasonable knowledge were otherwise exported from the United Kingdom (except to a marine installation); and
- (iv) reused transit packaging (except reused transit packaging imported into the United Kingdom);]

“C” is the percentage prescribed in paragraph 4 below in relation to the class of producer;

“X” is the percentage prescribed in paragraph 5 below as the [^{F12}recycling] target for the relevant year; and

“Z” is the amount by tonnage of packaging waste which is to be [^{F13}recycled] within the relevant year.

^{F14}(2)

(3) Where in the preceding year the producer has handled any recyclable material (whether in the form of packaging or packaging materials), the producer shall [^{F15}recycle] an amount of packaging waste consisting of that material calculated as follows—

$$M \times C \times Y = Q$$

where—

“M” is the amount in tonnes to the nearest tonne of the recyclable material (whether in the form of packaging or packaging materials) handled in Great Britain by the producer in the preceding year;

“C” is the percentage prescribed in paragraph 4 below in relation to the class of producer;

“Y” is the percentage prescribed in paragraph 6 below as the recycling target for the relevant year; and

“Q” is the amount by tonnage of packaging waste consisting of that material which is to be recycled in the relevant year.

[^{F16}(4) Where in the preceding year the producer has handled any glass (whether in the form of packaging or packaging materials), the producer shall recycle by re-melt an amount of glass packaging waste calculated as follows—

[^{F17} ^{F18}

where $\frac{75(L \times B \times Y)}{100} = G$

“L” is the amount to the nearest tonne of the glass (whether in the form of packaging or packaging materials) handled in Great Britain by the producer in the preceding year;

“B” is the percentage prescribed in paragraph 4 in relation to the class of producer;

[^{F19}“Y” is the percentage prescribed in paragraph 6 as the recycling target in respect of glass in relation to the relevant year;]

^{F20} ...

“G” is the amount by tonnage of glass packaging waste which is to be recycled by re-melt in the relevant year.]]

7.—(1) The amount of packaging waste to be recycled by a small producer who has elected to follow the allocation method is calculated as follows—

$$A \times B = Z_s$$

where—

“A” = a/1,000,000;

“a” is the annual turnover of the producer in the last financial year in respect of which audited accounts are available before the relevant date, rounded up to the nearest ten thousand pounds;

“B” is the recycling allocation for the relevant year prescribed in paragraph 8 below; and

“Z_s” is the amount of packaging waste (in tonnes) which is to be recycled in the relevant year.

(2) For the purposes of this paragraph, a small producer shall carry out his recycling obligations by recycling the recyclable material he handled which is predominant by weight.

[^{F30}8. The recycling allocation “B” is 35 for [^{F31}the year [^{F32}2024].]]
