

### SCHEDULE 3

#### PROVISIONS FOR CLASSIFYING DANGEROUS PREPARATIONS

#### PART II

#### CONCENTRATION LIMITS TO BE USED IN THE EVALUATION OF HEALTH HAZARDS

*Other than gaseous preparations*

**5.1** Preparations that produce such effects are classified as sensitising and assigned:

- the symbol Xn and phrase R42 if this effect can be produced by inhalation,
- the symbol Xi and phrase R43 if this effect can be produced through contact with the skin.

The individual concentration limits specified in Table V determine, when appropriate, the classification of the preparation.

**Table V**

<i>Classification of the substance</i>	<i>Classification of the preparation</i>	
	<i>Sensitising with R42</i>	<i>Sensitising with R43</i>
Sensitising with R42	concentration $\geq$ 1%	
	R42 obligatory	
Sensitising with R43		concentration $\geq$ 1%
		R43 obligatory
