

## SCHEDULE 3

### PROVISIONS FOR CLASSIFYING DANGEROUS PREPARATIONS

#### PART II

#### CONCENTRATION LIMITS TO BE USED IN THE EVALUATION OF HEALTH HAZARDS

**Note**

Simple application of the conventional method to preparations containing substances classified as corrosive or irritant may result in under-classification or over-classification of the hazard, if other relevant factors (eg pH of the preparation) are not taken into account. Therefore, in classifying for corrosivity, consider the advice given in the approved classification and labelling guide regarding classification as corrosive and paragraph 4(4)(b) and (c) of Part I of this Schedule.
