4. In this Schedule—

“approval”, “certificate of conformity” and “test report” have the meanings respectively given in Part 1 of Schedule 4;

“effective date” means—

 - (a) in the case of an amateur built vehicle, a vehicle manufactured using parts from a registered vehicle or a rebuilt vehicle (as respectively defined below), the 1st January immediately preceding the date of manufacture of the engine by which the vehicle is propelled, if that date is earlier;
 - (b) in any other case, the date of manufacture of the vehicle;

“multi-purpose vehicle” means a vehicle intended for the carriage of both passengers and their luggage or goods and falling within category M₁ or N (subject however to paragraph 10);

“Part 2 vehicle” means a relevant vehicle of a class which falls within category M₁ or N₁ and is—

 - (a) a personally imported vehicle within the meaning of paragraph 5,
 - (b) an amateur built vehicle within the meaning of paragraph 6,
 - (c) a vehicle manufactured in very low volume within the meaning of paragraph 7,
 - (d) a vehicle manufactured using parts from a registered vehicle within the meaning of paragraph 8,
 - (e) a rebuilt vehicle within the meaning of paragraph 9,
 - (f) a left hand drive vehicle,
 - (g) a motor caravan,
 - (h) an armoured vehicle,
 - (i) an ambulance, or
 - (j) a hearse;

Status: This is the original version (as it was originally made).

“Part 3 vehicle” means a relevant vehicle of a class which falls within category M₁ or N₁ but is not a Part 2 vehicle.

(2) A reference in a table in this Schedule to any numbered item is, except where otherwise provided, a reference to the item so numbered in that table.

5.—(1) A vehicle is a personally imported vehicle if either the conditions in sub-paragraph (2) or those in sub-paragraph (3) are satisfied (“A” being, in the following sub-paragraphs, the applicant for individual approval).

(2) The conditions in this sub-paragraph are satisfied if—

- (a) the vehicle has been imported by A upon entry into the United Kingdom,
- (b) A had, prior to the time the vehicle was imported, been normally resident in a country other than the United Kingdom for a continuous period of at least 12 months,
- (c) A intends to become normally resident in the United Kingdom,
- (d) the vehicle has been in the possession of and used by A in the country where A was normally resident for a period of at least 6 months before its importation, and
- (e) the vehicle is intended for A’s personal or household use in the United Kingdom.

(3) The conditions in this sub-paragraph are satisfied if—

- (a) A is a serving member of the Armed Forces and intends to import it into the United Kingdom within 12 months of the date of the application for individual approval;
- (b) at the time of that application A has been normally resident in a country other than the United Kingdom for a continuous period of at least 12 months; and
- (c) paragraphs (c) to (e) of sub-paragraph (2) are satisfied.

(4) Subject to sub-paragraphs (5) to (7), for the purposes of this paragraph A is to be treated as being normally resident in a country if—

- (a) A usually lives in that country for a period of, or periods together amounting to, at least 185 days in a period of 12 months; and
- (b) that period, or those periods, of residence occur because of A’s occupational and personal ties to that country.

(5) Where A has no occupational ties, sub-paragraph (4)(b) does not apply provided that A’s personal ties show close links with that country.

(6) Where A has occupational ties in one country and personal ties in a second country, A is to be treated, for the purposes of this paragraph, as being normally resident in that second country if either—

- (a) A’s stay in the first country is in order to carry out a task of a definite duration, or
- (b) A returns regularly to the second country.

(7) But if A is a United Kingdom citizen whose personal ties are in the United Kingdom and whose occupational ties are in a country other than the United Kingdom, A is to be treated as normally resident in that other country if A has lived there for a period of, or periods together amounting to, at least 185 days in the period of 12 months immediately preceding the date of entry into the United Kingdom.

(8) In this paragraph, “serving member of the Armed Forces” means a person who is employed by Her Majesty’s air forces, Her Majesty’s military forces or Her Majesty’s naval forces but who is not a serving member of any of the reserve forces.

6.—(1) A vehicle is an amateur built vehicle if—

 - (i) by R,
 - (ii) by one or more relevant individuals acting on behalf, and under the direction, of R, or
 - (iii) by R and one or more relevant individuals acting on behalf, and under the direction, of R.

(2) For the purposes of this paragraph, a relevant individual in relation to a motor vehicle is an individual who does not, at any time during the period when the construction or assembly of the vehicle was being carried out, carry on a business in the course of which motor vehicles are normally constructed, assembled or modified.

7.—(1) A vehicle is a vehicle manufactured in very low volume if the condition in subparagraph (2) is satisfied.

(2) The condition is that the total number of vehicles of the family of types to which the vehicle in question belongs which are manufactured in the world during any period of 12 months falling within the period of 36 months immediately preceding the month in which the vehicle was manufactured does not exceed 300.

8. A vehicle is a vehicle manufactured using parts of a registered vehicle if—
- (a) it is constructed or assembled by a person carrying on a business in the course of which motor vehicles are normally constructed or assembled;
 - (b) it is equipped with an engine which has previously been used as the engine of another vehicle which had been registered under the 1994 Act or any earlier Act providing for the licensing and registration of mechanically propelled vehicles; and

 - (ii) previously formed part of a vehicle registered under the 1994 Act or any earlier Act providing for the licensing and registration of mechanically propelled vehicles.

Status: This is the original version (as it was originally made).

(2) For the purposes of sub-paragraph (1) the approval authority is required to assign a vehicle identification number to a vehicle where it appears to the authority upon receipt of an application under regulation 27 that the vehicle does not have a vehicle identification number which—

- (a) satisfies the requirements set out in paragraph 3 of the Annex to Council Directive [76/114/EEC](#)(1),
- (b) has previously been assigned under this Schedule, or
- (c) if it does not fall within paragraph (a) or (b), is adequate for the purpose of enabling the vehicle to be identified.

10. For the purpose of determining whether a multi-purpose vehicle falls into category M₁ or N, if the manufacturer so requests a vehicle which has—

 - (ii) a wheelchair user restraint system comprising a minimum of three anchorage points to provide a pelvic and upper torso restraint system.

2. Wheelchair tie-down devices

2. All wheelchair tie-down devices must comply with ISO 10542 and be marked accordingly.

3. Location and geometry of anchorages

3. The geometry of the wheelchair tie-down and occupant restraint system anchorages and webbing must comply with ISO 10542. A surrogate wheelchair as defined in ISO 10542 or equivalent must be used for this purpose.

4. Testing of restraint system anchorages

4. A static test shall be conducted on the anchorage points for both the wheelchair tie-downs and occupant restraints in accordance with the following requirements:

- (f) the tests must be conducted on a vehicle or a representative section of a vehicle structure including any vehicle fittings that are likely to contribute to the strength or rigidity of the structure;
- (g) the forces specified in 5 below must be applied by means of a surrogate wheelchair of adequate strength as defined in ISO 10542, or equivalent, with attachment points for the front and rear tie-downs and reproducing the geometry of the wheelchair tie-down system;
- (h) the forces specified in 6 below must be applied by means of a traction device specified in paragraph 5.3.4 of Annex I to Directive [76/115/EEC](#) as amended by Directive [96/38/EC](#) and supported on the surrogate wheelchair defined in (b) above;

Status: This is the original version (as it was originally made).

- (i) the forces in (b) and (c) above must be applied simultaneously in the forward direction at an angle of $10^\circ \pm 5^\circ$ above the horizontal plane. The force in (b) must be applied at a height of not less than 200 mm and not more than 300 mm measured vertically above the floor of the wheelchair space;
- (j) the force in 5(b) must be applied in the rearward direction at an angle of $10^\circ \pm 5^\circ$ above the horizontal plane at a height of not less than 200 mm and not more than 300 mm measured vertically above the floor of the wheelchair space;
- (k) all forces must be applied as rapidly as possible through the central vertical axis of the wheelchair and wheelchair space; and
- (l) all forces must be maintained for a period of not less than 0.2 seconds;

For test purposes the components comprising the wheelchair tie-down and occupant restraint devices may be replaced with components suitable for test purposes having a similar function.

5. Forces applied to a wheelchair tie-down system

- 5. The force applied to the surrogate wheelchair:
 - (m) in the forward direction to be 24.50 kN;
 - (n) in the rearward direction to be 12.25 kN.

- 7. The anchorages will meet the test performance requirements if—
 - (o) no part of the system has failed, or become detached during the test;
 - (p) no part of the anchorage system has deformed to such an extent that sharp edges or protrusion may cause injury.

8. Transitional provisions

8. In the case of a vehicle type for which evidence of a test is provided, and that test was conducted on or before 29th April 2009 the following variations apply:

- (q) in paragraph 5(a) for “24.50 kN” substitute “22.25 kN”;
- (r) in paragraph 5(b) for “12.25 kN” substitute “11.00 kN”.

Part B

Instead of complying with Part A an alternative wheelchair tie-down system, docking system or occupant restraint system may be fitted. This may include a rearward facing wheelchair arrangement with appropriate safety features. Evidence must be provided to the approval authority that the system offers an equivalent level of occupant protection for the wheelchair user.
